Dear Sir,

Congratulations – your institute has been approved as an AWS academy.

As a next step you need to complete the following steps

1. Accept the Terms and Conditions as the Central Point of Contact with the login credentials that you would have received in your email (mail would have been received at <research@svcet.ac.in>)
2. Appoint educators that you had shared in the note and have them accept the Program guide – see attached snap for AWS Academy Foundation Level curriculum – nominate for this curriculum only currently unless you have instructors certified for advanced curriculum. Also chose English only as the preferred language.
3. Ask your educators to complete the mandatory online module that has been designated to them
4. Run one complete batch of students
5. Post this your academy gets listed on the AWS Global Web site

Ping for any clarifications

Regards,
