

BEST PRACTICE 1

TITLE:IT ENABLED INFRASTRUCTURE

OBJECTIVES:

- Promote prompt communication
- Enhance academic process
- Blended learning approach
- Smooth administration
- Provision for e-governance

CONTENT:

- Wifi facilities available for the faculties and students 24*7 for the facilitation of administration and teaching learning process at our campus.
- Students and faculties are provided with google mail IDs on the entry. Class students were grouped to facilitate the easy communication and sharing of academic content at single entry.
- Google Classroom (GCR) facilities are also available to post the information and reposit the class notes and links for the references. Moodle online portal access is available for all the students with a unique ID.
- Blended learning is implemented through these google applications everyday.
- Library has an automated KOHA software system for library organization. Delnet, an online journal application, is open to all students and faculties. It can be accessed remotely too. Students can access e PG pathshala, MOOC courses at the computer facilities in the lab with high speed internet access.
- GEAR box application is created to post the innovative ideas to contribute for Innovation and development of entrepreneurship.
- For the e-governance system, MEDSTEER- an HMS software is installed to communicate with the IT department, Electrical department, Plumbing department and maintenance department.
- Edumate software is available for student governance. Basic demographic details and academic details are stored in Edumate.
- Alumni book application is installed for the Alumni registration which has provision to enter all the work details, achievement and progress. A link is shared in the Alumni whatsapp group to get registered to Alumni book. These details can be accessed by all the students of our institute to widen the placement opportunities.

CHALLENGES

- Need high speed internet connections
- LAN facilities
- Trained personnels required for IT

PRACTICE

- Faculties and students were sensitized about the G-Suite applications, Moodle-LMS, Edumate software
- Librarians were trained in implementation of KOHA software
- Students were given guidelines to use the online applications

EVIDENCE OF SUCCESS:

- Students satisfied with the blended learning approach
- Well organization of books and library materials at library
- Transparent administration mechanism
- Smooth Maintenance activities
- Prompt communication of informations

PROBLEMS ENCOUNTERED

- Availability of trained personnels
- Interrupted internet connections 24*7

BEST PRACTICE 2

TITLE: COLLABORATIVE ACTIVITIES THROUGH MOUs WITH NON GOVERNMENTAL ORGANIZATION(NGOs)

OBJECTIVES:

- Promote social network for outreach activities
- Support of underprivileged community
- Health awareness to the public
- Nursing service to needy population

CONTENT:

Our college has extensive collaborative activities with the NGOs through establishment of Memorandum of Understanding (MoUs).

- **Jally home** - a home for underprivileged children from the **gypsy** community. The institution is providing free education to nomadic girl child in B.Sc.Nursing course every year with the aim to promote the underprivileged society through education.
- **Satya Special School**, a school for specially challenged children. MoU is signed with this organization for the nursing care service, health awareness program and research relevant to specially challenged. Awareness on dietary influence for Cerebral palsy was organized at 4 centers of Satya Special School for the Antenatal mother. Research was conducted among the mothers with specially challenged children about the child safety practices. Our students actively participated in Rally to create awareness about the rights of Specially challenged children for the public.
- In collaboration with **Rotaract association**, a NGO for voluntary services, a blood donation campaign was organized and collected 100 units of blood for the JIPMER blood bank with our student and faculty volunteers.
- **Uyirthuli** is a voluntary organization for social service. Had a good contribution towards the organization of health awareness sessions on Dengue, organ donation and Blood donation at schools and colleges around Puducherry.

CHALLENGES

- Need prior planning
- Ensure utilization of e-resources
- Getting permission from authorities

PRACTICES:

- Free education to girl child every year
- Plan calendar of activities with all the MoU organization
- Periodic organization of health awareness session with our students support
- Conduct research about the current nursing concepts

EVIDENCE OF SUCCESS

- Feedback from the beneficiaries was excellent
- Attitude change observed among the students
- Public interest in attending the events

PROBLEMS ENCOUNTERED:

- Time constraint

Resource requirement
