

2. PROGRAM CURRICULUM AND TEACHING - LEARNING PROCESSES (120)

2.2.4. Initiatives related to industry interaction (15)

2.2.4.1 Initiatives for industry interaction

Industry interaction plays a crucial role in bridging the gap between academic learning and real-world applications. To enhance students' practical knowledge and industry readiness, various initiatives are undertaken to foster strong collaborations with industries.

Industry involvement in the program design and partial delivery of any regular courses for students

- MOU's was done with industries
- To strengthen interaction with industries and to keep our students updated with the latest trends in Computer Science & Engineering, the Department has entered into an MoU with the following companies.
- MOU's was done with industries to emphasize on
 - (a) Internship
 - (b) Project Workshop for Students
 - (c) Industrial Visits
 - (d) Students specific Training

Impact analysis of industry institute interaction and actions taken

srivenkates

SPIRE TO EX

The effectiveness of this practice can be measured by the following parameters

- Students gain practical, industry-relevant skills through internships, workshops, and live projects. This real-world exposure increases their employability and ensures they have both theoretical knowledge and hands-on experience.
- Faculty members often collaborate with industry experts to improve the curriculum.
- The interaction develops student's awareness on job functions in the industries, attitude to adapt towards software industries, proper practical and relevant knowledge, skills and competencies etc.
- It helps to cultivate mutually beneficial and lasting relationships with one another
- Making available Institute infrastructure facilities to the industries and vice versa.
- Plan for recruiting visiting faculties for projects and guest lectures towards current technology.
